

# Visualize This!

A Canada-wide competition to challenge your creativity and experiment with data visualization tools.

## Datasets

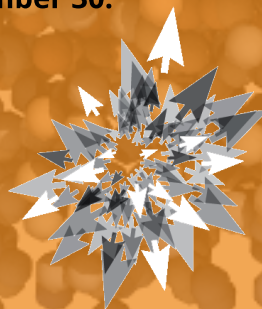

This year's challenge is comprised of two separate competitions:

- A scientific visualization challenge based on a molecular dynamics simulation dataset.
- A humanities visualization challenge based on a textbase from the Orlando Project.

*Note: Researchers from all disciplines are encouraged to enter. These datasets offer a chance to enhance your visualization skills, no matter what your field of study may be!*

## How to Participate

- Register your interest at <https://tinyurl.com/vizthis2018>
- Download one of the two datasets and start working on your visualization.
- Final solutions are due by November 30.
